

GENERATOR SET ANNUNCIATOR

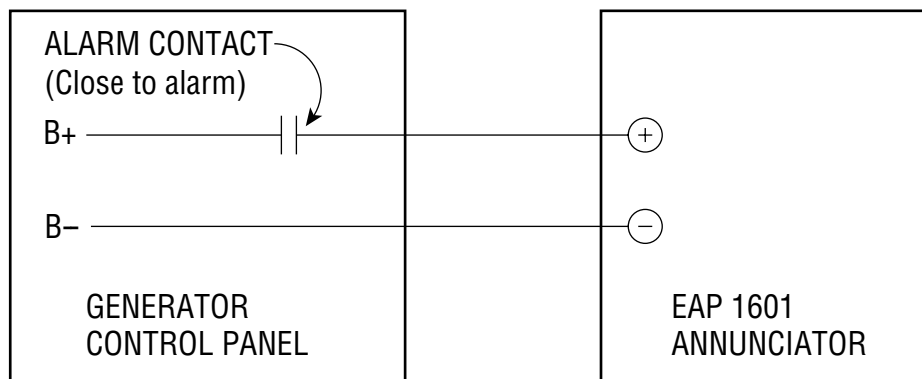

- Dimensions: 5" high x 7" wide x 2 1/2" deep
- Oversize face plate available for flush mounting
- For 12 or 24 Vdc systems (specify)
- May be used for RUN or FAIL alarm duty

MODEL CODE

EAP 1601-12 FOR 12 Vdc systems
 EAP 1601-24 FOR 24 Vdc systems

The **EAP 1601** annunciator is designed to provide remote annunciation of the operation or failure of generator set. During an alarm condition, the lamp will be illuminated and the audible annunciator will sound. The audible annunciator may be silenced by operating the "silence" button. All circuits will reset when the remote initiating dc supply is removed.

EXTERNAL CONNECTIONS

NOTE: Specifications subject to change without notice.
